OLAYORIJU INIOLUWA

Full Stack Software Engineer

Passionate Full Stack Developer from Lagos, Nigeria. I specialize in building robust Python (FastAPI/ Django) backend microservices and high-fidelity React user interfaces.

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer

2024 - Present

Freelance & Open Source Development

- Architected Serguo AI: OCR text-extraction app using Gemini Vision models, reducing PDF translation pipelines from minutes to seconds.
- Built Harth AI Background Remover: deployed FastAPI endpoints utilizing deep learning models inside Docker environments.
- Created Kefi: full-featured social media platform utilizing Django backend, MySQL database, and secure user follower schemas.

Software Engineering Fellow

2023 - 2024

Coding Academy Bootcamp

- Mastered database normalization, schema design, and query optimization using MySQL and PostgreSQL.
- Built responsive team projects and simulated company landings (e.g. Aqua Steps) using Bootstrap and JavaScript.
- Received certifications in full-stack Python/Django web development paradigms.

Programming Teacher & Coding Instructor

2023 - Present

Independent & Tutorial Services

- Taught Python syntax, data structures, and object-oriented programming concepts to over 100 students.
- Instructed web fundamentals (HTML5, CSS3, JavaScript basics, DOM manipulation) and database querying.
- Guided students in deploying their first terminal utilities and web applications.
